REPORT OF THE COUNCIL OF MANAGEMENT AND OF THE DIRECTOR FOR 1954

THE Institute's sixth year was also the opening year of an exceptionally important excavation : Beycesultan, described in the previous report as a promising site, has become the scene of a notable and successful campaign. There can now be no doubt that it is of major importance ; that the palaces and its city, besides being in themselves arresting, will, in future seasons, throw yet more light on a new culture in lands where evidence of contact between the Hittites and the West has long been desired. Readers of *The Times* will be familiar with what was discovered, but a summarized report appears in the following pages and a fuller one will be published in *Anatolian Studies*, Vol. V. Plans for work on Islamic remains at Harran were, as subscribers will recall, left in abeyance during 1954 owing to the absence of Dr. Storm Rice in America. Study of the Assyrian texts from Sultantepe is still in progress, and a further interesting instalment is being prepared for publication, to follow what has appeared in *Anatolian Studies*, Vol. IV.

COUNCIL OF MANAGEMENT :

No retirements have taken place, but the death of Professor Frankfort has left a gap in the Council which it will be hard to fill. He was one of those rare scholars whose knowledge is both wide and deep. His field-work in Iraq was masterly ; his publications interpreted his own discoveries and those of others in relation to art, mythology, and sociology ; his approach was vivid and original but always well documented. To his colleagues of the British Institute at Ankara, his stimulating personality and his friendly sympathy were invaluable. It is a pleasure to recall that he visited the hostel, and that his interest in Anatolia dates back to one of his first publications, *Studies in Early Pottery of the Near East*.

The Council is happy to add to its members Mrs. Maxwell-Hyslop and Mr. Ian Macpherson.

LECTURES IN LONDON :

It was a special pleasure to welcome a distinguished Turkish colleague, Professor Bahadır Alkım, as lecturer this spring, and a privilege to hear his interesting account of the excavations at Karatepe. The Director himself spoke at the Annual General Meeting of the Institute's work at Alanya, while a third lecture by Dr. Picken, arranged in conjunction with the Royal Asiatic Society, marked a new departure. It was on Turkish folk-music, examples of which were played to the audience. The titles of these three lectures were as follows :—

Alanya : Sea Fortress of the Seljuk Turks : By Mr. Seton Lloyd, on 22nd January, 1954.

Local Musics in Anatolia : By Dr. L. E. R. Picken, on 11th March, 1954, in conjunction with the Royal Asiatic Society.

The Archæological Results of the Excavations at Karatepe (1947-1953) : By Dr. U. Bahadır Alkım, on 7th May, 1954.

PUBLICATIONS :

Anatolian Studies, Vol. IV, now in subscribers' hands, is considerably fuller than previous volumes, reflecting the increase of research covered by the Director, Fellows, and Students, and its varied scope will be carried forward in the succeeding volume.

FINANCE :

The finances of the Institute are not yet sufficiently strong to be able to carry any but a small part of the excavation programme. For this to continue we are dependent on the special support of individuals and bodies ; and this has in the past been generously given, and in particular by Sir David Russell, without whose

contributions, indeed, our activities in the field would have been gravely handicapped. From the amounts we have been able ourselves to allocate towards next year's work at Beycesultan, and from some most welcome promises, we see our way to covering the bulk of the year's programme, but we still need something of the order of £1,000. The great interest and importance of this work is stressed elsewhere.

LIBRARY :

The effect of the rise in the rent paid by the Institute has been felt this year in the Library, the grant for which has been cut by £100. Nevertheless, more than forty items have been purchased, including Schliemann, *Briefwechsel 1842-75*, ed. by E. Meyer (1950) ; Bechtel, *Die Historischen Personennamen des Griechischen bis zur Kaiserzeit* (1917) ; Grabar, *Byzantine Painting* (1953) ; Kjellberg, *Larissa am Hermos II* ; Bochlau and Schefold, *Larissa am Hermos III* (1942) ; Mommsen, *Der Maximaltarif Diocletians* (1893) ; Chantre, *Recherches Anthropologiques dans le Caucase* (1886-7) vols. 1-3 ; Pauly-Wissowa's great encyclopaedia in reprinted form is now completed. The Library catalogue has now registered over 2,180 items, and though far from complete, represents an efficient working instrument for the study of ancient Anatolia, particularly if allowance is made for the short time the Institute has existed. We owe much to the generosity of donors in this, as in past years. Gifts include :—

FROM THE AUTHORS :

- Dr. H. Gollob, *Die internationale archaische Trinitas* (Vienna 1953).
- Lord Kinross, *Within the Taurus* (1954).
- P. Dikaïos, *Guide to the Cyprus Museum* (revised ed., 1953).
- L. Robert, *La Sanctuaire d'Artemis à Amyzon* (1953).
- N. E. Vrouyr, *Inscriptions Ourartéennes* (Antwerp 1953).
- Steven Runciman, *A History of the Crusades*, vol. III (1954).
- From Russell Meiggs, Esq. : T. L. Shear : *Sardis X*, pt. I (1926), and H. C. Butler, *Sardis I*, pt. I (1922).
- From Mme. G. de Csippek, *Istanbul* (1953) and *Çanakkale* (1953).
- From Miss Melton, *Hotel Guide of Turkey* (1953) and *Guide to Greece* (1954).
- From Mr. Mauduit, Münim Eser, *Encyclopaedic Guide to Istanbul, Bursa and Yalova* (1954) ; Vasif Okçugil, *Yeni Türkçe-İngilizce Okul Lûgati* (1945).
- From Turkish Press Department, *Guides to Ephesus, Pergamum and Izmir* (1953).
- For various offprints, thanks are due to M. L. Robert, Mr. and Mrs. R. L. Braidwood, Dr. J. B. Segal, Mr. M. H. Ballance, Professors H. G. Güterbock, S. N. Kramer and A. Goetze, Bay Nezih Firatli, and Dr. Stapleton.

BEYCESULTAN :

Summary of First Year's Work :

Beycesultan, evidently the capital of an important province in antiquity, is situated near a river crossing on the upper Meander, and covers about two-thirds of a mile. Within the city stood a vast palace now partly uncovered, built, apparently, in the latter half of the fifteenth century B.C., and destroyed by fire in the earlier half of the fourteenth. Architecturally it is remarkable, for it contains a sunk "lustral area", light wells, staircases, long parallel galleries, traces of fresco on the walls, and great store-jars. Some of these features recall the palaces of Crete, while a novel feature is the way the court is suspended on beams over sleeper walls.

Subsequently a smaller palace was constructed and twice remodelled, perishing through fire at the end of its second phase, perhaps about 1225 B.C., and finally sacked not long afterwards.

Contemporary with the smaller palace were certain private houses and some shops which stood beyond a paved street. One shop was equipped with store-jars, and stocked with pottery and grain. Another evidently sold wine, since it contained

vats, a bar, drinking utensils, and knuckle-bones presumably for sport. But disaster had overtaken the customers, seven men and one woman, whose bodies lay distorted on the floor.

Characteristic of much of the pottery is a tendency to imitate metalwork. A slip, suggestive of gold, silver, or bronze, brightened the surfaces, while the shapes included bifoil, trefoil, or quatrefoil vessels and elegant chalices. The only imported wares so far identified are a few late Mycenaean III B sherds from the Little Palace.

If Beycesultan is, as seems probable, a centre of Arzawan culture and thus a representative of the civilization which challenged Hittite domination, its periods of prosperity and disaster can be equated with historical events, on the lines suggested in *The Times* of 24th September. And, apart from the claims of history or the demands of a new distinctive culture, Beycesultan now offers for further exploration its great town and the first grand palace of its period yet discovered on Anatolian soil north of the Taurus.

The following is an account of the administrative aspect of the excavations. In April, the Director, accompanied by Mr. and Mrs. Mellaart, paid a preliminary visit to the site, in order to establish contact with the local authorities, find accommodation for the expedition and make arrangements for obtaining local labour. Much help and kindness was encountered on all sides. A peasant's house was rented in the village of Menteş, about a mile from the site, where, by the generosity of the Vali of Denizli, permission was obtained to use the small primary school as museum and workshop. Supplemented by tents, living- and working-space was thus assured. Meanwhile, in Ankara, skilled workmen, known to the Institute from previous excavations, were engaged and additional help obtained from Gordium, where the work of the Pennsylvania expedition was temporarily suspended. A good cook and a reliable driver were at the same time engaged and, through the kindness of Prof. Dr. Tahsin Özgüç, the expedition was fortunate in obtaining the services of a first-rate foreman, Satılmış Saygısız.

As a result of these precautions, the administration and practical functions of the expedition proceeded smoothly. The small permanent staff consisted of Mr. J. Mellaart, as senior field-assistant, Mrs. Arlette Mellaart who undertook the house-keeping, accountancy and registration of objects, Mr. G. R. H. Wright as architect and surveyor, Mrs. Wright and Mr. C. Burney as general assistants. Two senior Council members, Professor W. M. Calder and Mr. R. D. Barnett each joined the expedition for some weeks and used the camp as a centre for archaeological work in the Çivril neighbourhood. Their advice and support were of considerable value to the Director. Bay Lütfi Tuğril, who had been appointed Turkish commissar, was also a welcome member of the expedition. His tact and good sense in handling practical matters were greatly appreciated. The season chosen was one when agricultural work was temporarily in abeyance, and unskilled labour was not difficult to come by. By the first week in July, however, when the season ended, the harvest had begun and the prolongation of work would have been impossible. Arrangements were then made to guard the site and two rooms were rented in the village, where equipment could be stored, pending a resumption of the excavations in the coming year.

We are deeply grateful for the following donations received in support of the excavation at Beycesultan last season (1954) :—

Walker Trust, per Sir David Russell . . .	£1,000 0 0
Craven Fund Committee, Oxford . . .	£100 0 0
Griffith Institute, Oxford . . .	£100 0 0
Wenner-Gren Foundation, N.Y. . . .	\$300.00
Francis Neilson, Esq. . . .	£50 0 0
Society of Antiquaries of London . . .	£50 0 0
Charrington and Co., Ltd. . . .	£10 0 0

and for a Leverhulme Research Award of £300, a personal grant to the Director for the excavations.

ANKARA :

During this season, sixteen students and senior students were registered and visited Turkey for purposes of research. The hostel accommodation was continually in use, except for a short period during the Beycesultan excavations, when the opportunity was taken of having the house redecorated. Activity in the Institute diminished during August, but was again considerable during the autumn months. An unusual number of archaeological expeditions had been in progress during the current season and many foreign colleagues visited the British establishment, to use the library and discuss their discoveries.

In view of the very high rent of the Ankara premises, the Council had considered the possibility of raising a mortgage in order to purchase the freehold of the property. Discussions on these lines in Ankara have now shown that the values of real estate in Turkey being at present considerably inflated, the purchasing price would be beyond the means of the Institute. The present lease will last until the end of 1955 ; and as it appears probable that a new adjustment in local legislation may by then result in an even higher rent being authorized, it seems probable that new accommodation for the Institute will have to be sought in a district further from the centre of the town, where land-values are less high.

Activities of Senior Students, Students, and others :

Professor W. M. Calder spent May and June in Turkey, engaged in epigraphical work connected with the revision and republication of Anderson's Classical Map. He was accompanied by *Mr. Michael Ballance*, (Institute Fellow for 1953-54), with whom he travelled to various parts of the country, occasionally using the Beycesultan camp or the Ankara headquarters as a base.

Mr. R. D. Barnett, Deputy Keeper of Egyptian and Assyrian Antiquities of the British Museum, after spending some time in Ankara, also joined the Beycesultan expedition for several weeks and was able to make some epigraphic discoveries in the Çivril Valley.

Dr. W. H. C. Frend, Lecturer on Church History at Cambridge University, spent parts of August and September at the Institute in Ankara and travelling in Lycaonia in connection with his specialised researches in early Christian epigraphy. He reported a number of important new texts.

Dr. O. R. Gurney, Shillito Reader in Assyriology at Oxford University, spent three autumn months at the Institute in Ankara, where he continued copying literary texts among the Sultantepe tablets in the Ankara Museum. These included a new fable of a type hitherto unknown in Assyrian literature. Dr. Gurney was assisted by a Leverhulme Grant.

Mr. J. B. Beckwith, Assistant Keeper of Textiles at the Victoria and Albert Museum, was registered as a Senior Student during a visit to Turkey in connection with research for which he also had received a Leverhulme Grant.

Mr. and Mrs. James Mellaart took part in the Beycesultan Excavations and afterwards assisted Mr. Sinclair Hood in the Athens School excavations on the island of Chios. They returned to the Institute in Ankara for a period of two months in the autumn during which Mr. Mellaart aided the Director in preparing the preliminary report on the Beycesultan excavations. During October he also took part in a short reconnaissance connected with his earlier survey of the Konya plain. During December he is to assist Prof. K. Bittel in the excavations which are to be resumed at Fikirtepe, near Istanbul.

Mr. Charles Burney (Institute Scholar for 1954-55), arrived in Turkey from Palestine in April. He took part in the Beycesultan excavations, after which he undertook a mound-survey, covering an area approximating to the ancient province of Bithynia. Travelling mostly by bicycle, he made a thorough investigation, over

a period of more than three months. The pottery notes and distribution maps prepared after his return to Ankara in the autumn should fill an important gap in our knowledge of northwestern Turkey. After leaving Turkey, arrangements were made for Mr. Burney to continue his archaeological studies at the British School in Baghdad.

Mr. G. R. H. Wright was employed as architect and surveyor during the excavation at Beycesultan. He afterwards travelled to Cyrenaica where he was due to take part in excavations organized by the Griffith Institute near Benghazi.

Mr. Anthony Mauduit, a graduate of the London Architectural Association, was afforded Student facilities for the purpose of studies connected with an I.C.I. Travelling Studentship. Permission was obtained for him to visit architectural monuments in the protected zone east of the Euphrates, and he spent some weeks in July and August making drawings and photographs of Seljuk and other buildings. It is hoped that later in the year an exhibition of his work will be arranged at the Association headquarters in Bedford Square.

Other individuals afforded Student privileges for the purpose of research in Turkey included *Miss D. Hereward*, Assistant Lecturer in Classics, Royal Holloway College, *Mr. D. B. Stronach*, King's College, Cambridge, and *Miss Linda Melton*.

WALKER TRUST EXCAVATIONS :

Work on behalf of the Walker Trust (St. Andrews) on the site of the Great Palace of the Byzantine Emperors at Constantinople was continued in June, July, and August, under the direction of Professor D. Talbot Rice, with Mr. David Oates as Assistant Director. Mr. David Stronach and Mr. David Wilson joined the staff as assistants, and Mr. Geoffrey Clark was there as architect. Mr. Ward Perkins, Director of the British School at Rome, was also present for some weeks, working on the history of constructional methods.

A few additional pieces of the mosaic floor were unearthed and lifted, as they were situated below a street. Several pits, to check evidence as to dating by means of stratigraphy were dug, but work was in the main concentrated on a large hole from surface to natural soil in the region of the great stone structure found in 1952. Some of the immense piers and vaults of this structure were laid bare, and a full and detailed study was made, which disclosed a number of successive building periods. At the request of the Director of the Archaeological Museum, this excavation has been left open, so that the structures may be inspected by delegates during the forthcoming congress of Byzantine Studies at Istanbul in September, 1955. Natural soil was reached at a depth of about 60 feet below the surface.

Without extending the excavations over areas now built upon, all has been done on this site that is possible. The next task is that of publication, and it is hoped that a final report on the Great Palace Excavations and on the mosaic will be ready for press during 1955.

EDINBURGH UNIVERSITY BOTANICAL EXPEDITION :

It was arranged that this expedition, led by *Professor Peter Davis*, should use the Ankara Institute as a base, while operating in the remote eastern provinces of Van and Hakkâri, during June-September. The party which included *Mr. O. Polunin* and a Turkish interpreter, *Bay Aydin Bilgutay*, passed through Ankara on their return journey, when it was understood that the scientific results had exceeded all expectations. The journey had been made in the Landrover car, purchased some time before by the University of Edinburgh, and this car afterwards remained at the Institute in Ankara for the use of members of the University working in Turkey in future seasons.

Report to the Members of the British Institute of Archaeology at Ankara.

We have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit. In our opinion proper books of account have been kept by the Institute so far as appears from our examination of those books and proper returns adequate for the purposes of our audit have been received from Ankara. We have examined the above Balance Sheet and annexed Income and Expenditure Account which are in agreement with the books of account and returns. In our opinion and to the best of our information and according to the explanations given us the said accounts give the information required by the Companies Act, 1948, in the manner so required and the Balance Sheet gives a true and fair view of the state of the Institute's affairs as at 31st March, 1954, and the Income and Expenditure Account gives a true and fair view of the excess of Income over Expenditure for the year ended on that date.

Provincial House,

98-106, Cannon Street, London, E.C. 4.
