

INDICES TO KADMOS I—X

IN HONOREM KONSTANTINOU DIMITRIOU KTISTOPOULOU

These indices to the first ten volumes of KADMOS are arranged in two sections, to contributors and to topics. They are dedicated with esteem and affection by his colleagues on the Editorial Board to the veteran of Minoan epigraphy, Mr. K. D. Ktistopoulos, who will reach the age of 80 on 28 October, 1971. Working since many years in the field of prehistoric Aegean writing he has made useful remarks based on his own pioneer statistical analyses, and suggested at an early stage some phonetic values for the Linear B signs which were later incorporated in the decipherment of Michael Ventris. With Miss Kober too he maintained a long and fruitful exchange of ideas. If KADMOS is relatively free of misprints, it is his careful vision which is largely to be thanked. Beyond this, his gentle wisdom and unfailing courtesy have established and sustained in our discipline the highest standards of academic etiquette.

We salute him with gratitude and respect.
