VORWORT

Beim Erscheinen von KBo XII vor vier Jahren war der zweite Teil der Edition der »Texte aus Stadtplanquadrat L/18« für das folgende Jahr vorgesehen. Jedoch erbrachte die Grabung des Jahres 1962 im gleichen Areal »Haus am Hang« erneut 430 Tafelfragmente, deren Aufarbeitung verständlicherweise eine Verzögerung bedeutete, sollten die Stücke der einzelnen Kampagnen doch nach Möglichkeit auf etwaige Zusammenschlüsse hin gesichtet werden. Dies geschah sowohl im Interesse der späteren philologischen Bearbeitung, wie auch wegen der von den Texten und dem Zusammenschluß mehrerer Fragmente erwarteten Klärung hinsichtlich der schwierigen stratigraphischen Deutung der Funde¹.

Der neue Tafelzuwachs zwang, erneut Texte historischen, erzählenden und mythologischen Inhaltes (meist aus den Grabungen von 1962) zu bringen, Textgruppen, die bereits in KBo XII enthalten waren. Der unerwartete Textgewinn zwang aber auch zu einer inhaltlichen Beschränkung des hiermit vorgelegten Heftes, indem die Masse der Festrituale, sowie die Texte in protohattischer und hurritischer Sprache erst in einem dritten, abschließenden Teil später vorgelegt werden können².

Die Arbeit an den Originalen im Archäologischen Museum zu Ankara erfolgte jeweils in den Herbstmonaten der Jahre 1963–1965, neben der Mitarbeit an den laufenden Kampagnen in Boğazköy. Beim Sichten und Kopieren war Frl. Christel Werner mir eine große Hilfe³. Dankbar gedenken wir dabei der freundlichen Unterstützung durch die Angehörigen des Archäologischen Museums in Ankara unter seinem Direktor, Herrn Raci Temizer.

FUNDLAGE DER TONTAFELSTÜCKE VON W. SCHIRMER

Alle Tafelfunde aus den Kampagnen 1960–1962 in L/18 stammen aus sekundärer Lagerung.

Die größte Gruppe, 626 Bruchstücke, fand sich westlich und nordwestlich des »Hauses am Hang« in altem Grabungsschutt, hatten doch Windkler-Makridi hier bereits 1907 mit den ersten Schürfungen begonnen. Eine zweite Gruppe, 36 Bruchstücke, kommt aus früher ausgegrabenen oder gereinigten Teilen des HaH bzw. des Altbaues (s. Skizze S. VII). Weitere 551 Bruchstücke sind zwischen Schutt und Gebäuderesten nachhethitischer, hauptsächlich phrygischer Zeit gefunden worden. 219 Tafelstücke stammen aus einer Schwemmschicht, westlich und nordwestlich vor dem HaH, die Kies und Geröll, dazu Mengen von Scherben mit sich führt.

Während die drei ersten Fundgruppen sämtlich aus dem Tafeldepot des HaH stammen können, bleibt die relative Einordnung der Schwemmschicht in die Zeit vor der Erbauung oder nach der Zerstörung des HaH bestimmend für die Frage, ob die in ihr aufgefundenen Tontafelbruchstücke zur Tafelsammlung HaH gehören können, oder ob sie einen anderen Herkunftsort haben müssen und damit Teil einer älteren Tafelsammlung sind.

Die ersten Beobachtungen in den Jahren 1960 und 1961 führten zu der Annahme, daß die in der Schwemmschicht aufgefundenen Tafelstücke nicht aus der Sammlung HaH stammen können, sondern eher dem sog. Altbau zuzuschreiben sind. Im Vorwort von KBo XII und in der Fundortübersicht dort werden sie als Fundgruppe C zusammengefaßt. Die Möglichkeit eines anderen Herkunftsortes war jedoch nicht auszuschließen, was insbesondere für Tafelstücke aus den unteren, mit Ziegelbrandschutt durchsetzten Lagen der Schwemmschicht (Fundgruppe D) galt.

Die weiteren Untersuchungen 1962 (und ergänzend 1963) haben jedoch gezeigt, daß der Altbau als Aufbewahrungsort für jene Tafeln nicht in Frage kommt und daß ein weiteres, in die Diskussion einzubeziehendes Gebäude in unmittelbarer Nähe des Tafelfundortes nicht bestanden hat. Dagegen konnte wahrscheinlich gemacht werden, daß nach der Zerstörung des HaH und vor dem Beginn der phrygischen Bautätigkeit hier ein Sturzbach sich seinen Weg talabwärts von Südosten nach Nordwesten über das HaH gebahnt und vor dem Gebäude einen großen Strudeltopf gebildet hatte, denn hier lag der Schwemmschutt wesentlich stärker, teilweise in tief eingeschnittenen Rinnen. Damit wären dann aber auch die Textbruchstücke aus dem Schwemmschutt vermutlich Teil der alten Tontafelsammlung im HaH. Die Streuung der Tafelbruchstücke scheint diese Erklärung zu bestätigen. Demnach sind die in KBo XII getrennt angeführten Fundgruppen C und D als Einheit anzusehen; um den Zusammenhang mit dem seinerzeitigen Fundortverzeichnis zu wahren, wird hier in KBo XIII als Fundortangabe C/D verwendet.

Ausführlich sind alle Beobachtungen und Überlegungen zur Fundlage der Tafelbruchstücke im Bericht über »Die Bebauung am unteren Büyükkale-Nordwesthang«, WVDOG 81, 1967, dargelegt.

¹ Im Vorwort von KBo XII waren als Sigel für die Bezeichnung des Fundzusammenhanges benutzt worden:

A aus dem Schutt früherer Grabungen

B aus nachhethitischer Bebauung außerhalb vom Haus am Hang

C im Zusammenhang mit dem sog. Altbau, südlich vom HaH

D in einer abgeschwemmten Schuttschicht, westlich vom HaH, die älter zu sein scheint als das Gebäude HaH.

Die wenigen Textfragmente aus den Grabungen 1936 und 1937 wurden in diese Fundortübersicht eingegliedert, ohne daß heute zu klären ist, ob sie etwa teilweise aus der erst 1960 in weiter Ausdehnung festgestellten Schwemmschicht stammen (Fundortbezeichnung A/C).
