### "Martuthunira: A Language of the Pilbara Region of Western Australia"

The document included with this read me file is an Acrobat pdf (portable document format) facsimile version of the work:

Dench, Alan Charles. 1995. <u>Martuthunira: A Language of the Pilbara Region of Western Australia.</u> Canberra:Pacific Linguistics. Series C-125. (Copyright, © the Author)

_____

### How do I read the document?

The pdf documents are accessible on Macintosh, PC/Windows and Unix platforms. You must have at least version 4 of Adobe's™ Acrobat Reader® application (Version 5 is current at the time of writing this document) for your platform in order to access the documents. This is a free download from www.adobe.com.

### What is included?

Access to the entire document is gained via the main icon entitled "Martuthunira". The grammar is separated into sections which may be viewed individually. These are enclosed in the folder named "grammar". At this stage, only those materials included in the original published work are made available here. Later versions of the package may include a more complete corpus and selected sound files.

### How do I navigate the document?

Double-clicking on the main icon entitled "Martuthunira" will bring up the title page and give you access to the Dedication and Table of Contents. Each item in the Table of contents is a link which will take you to the relevant chapter or section. In Acrobat reader, when you place the cursor over any clickable link, it will turn from an open hand (🖐) to a pointing finger (👆).

There are three ways to navigate around the document:
1) Use the scroll bars and arrows to navigate the document much as you would any document or web page in your favourite application or browser, or use the menu commands which Acrobat® provides for navigating the document as you read.
2) Use the bookmarks which appear in the pane on the left of the document. This will give you access to the main numbered sections within each chapter as well as the tables and figures.
3) A number of intertextual links have also been provided within the body of the document allowing you to jump quickly to any point which has been referenced in the text.

These include:
   a) Chapter and section numbering, ie.: Chapter 2; Section 3.5; §7.5.1
   b) References to sentence examples in the body of the text, ie.: See example 3.45
   c) References to cited works, ie.: Wordick (1982). All such items will be linked in the documents with the exception of references to sentence examples which appear on the same page as the reference.

Skipping back to where you were before following a link is as simple as either using the "Go back" or "Go forward" commands from the "Document" menu, or choosing the appropriate document from the list of open documents in the "Window" menu. In order for this second option to work, ensure you have unchecked the "Open Cross-Document Links in Same Window" button in the Preferences.

The precise destination of linked items may depend on such factors as screen resolution.

### How do I cite the document?
With the exception of a slightly different selection of photographs, the files are an exact facsimile of the published version (which is now out of print) and citations should make reference to this original.
